

Convention. EPA seeks to enhance its current information on how much mercury is used, in which products and manufacturing processes, and whether certain products are manufactured domestically, imported, or exported.

Reporting is required from any person who manufactures (including imports) mercury or mercury-added products, as well as any person who otherwise intentionally uses mercury in a manufacturing process under TSCA section 8(b). The Agency promulgated reporting requirements at 40 CFR part 713. To avoid duplication, EPA coordinated the reporting with the Interstate Mercury Education and Reduction Clearinghouse (IMERC).

Form number: 9600–024.

Respondents/affected entities: Entities potentially affected are those that manufacture (including import) mercury, manufacture (including import) mercury containing products, and those who intentionally use mercury in a manufacturing process.

Respondent's obligation to respond: Mandatory, per TSCA section 8(b) and 40 CFR 713.

Estimated number of respondents: 105 (total).

Frequency of response: Triennial.

Total estimated burden: 2,573 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$223,592 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 14,775 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease reflects a change in EPA's method of estimating the number of expected reports. In 2021, EPA amended the original final rule to effectuate the vacatur ordered by the Second Circuit Court. In this ICR, with data available from the Mercury Inventory and with no new changes to the rule itself, this ICR utilizes data from the Reporting Year 2021 of the Mercury Inventory. In the RY 2021, there were 105 submissions (the previous ICR used an estimate of 252). This ICR assumes each respondent completes the entire form. Wages were also updated to 2022 dollars. This change is an adjustment.
